PEACE - Barangay Sapang Community Enhancement Program

VIOLENCE AGAINST WOMEN AND CHILDREN

Violence against women and children law protects the right of all women and children from abuse. There are different types of abuse that the community must be aware of and to determine if they experience it. Once they are informed of these kinds of laws of protection, their voice can be heard and the pain/ struggle they experienced will have a justice. Abuse must not be a normal action existing in someone`s home, it is a violation of human rights that must be prevented.

We need to protect our rights in order to live peacefully without danger and harm. We want a happy and complete family but once there is a threat and abuse, we need to stand to stop it and protect our lives and innocent children.
